SECURE AUTOMATED
MAIL BALLOT SOLUTIONS

RELIA-VOTE™

Secure

High-integrity, automated mail ballot processing helps to maintain the high security demands of the election community .

Accurate

Ensure the mail ballot is printed, assembled, inserted and addressed correctly.

Transparent

Piece-level tracking enables monitoring, auditing, and reporting throughout the mail ballot process.

Process mail ballots with integrity

The demand for mail ballots is on the rise for election officials nationwide. Our Relia-Vote solutions can help jurisdictions to securely and cost-effectively automate the processing of mail ballots to meet the ever-stricter requirements and timelines.

Relia-Vote solutions provide accuracy, tracking, monitoring, auditing, and reporting across the entire outbound and inbound mail ballot process.

Proven. Trusted. Secure.

For over 20 years, BlueCrest has been helping election officials from counties of all sizes to process mail ballots securely and accurately using proven technology and best practices in process automation. Relia-Vote offers software, printing, inserting, and sorting solutions that can be stand-alone or integrated across all critical processes including ballot preparation, assembly, delivery, authentication, and reporting. The result is the highest level of data accuracy, assembly integrity, chain-of-custody/visibility, ballot verification, and reporting to make every aspect of mail ballot operations more effective, auditable, scalable, and accurate. No matter how many ballots you need to process, Relia-Vote solutions can help.

Prepare ballots

The Relia-Vote Ballot Manager software provides a secure way to prepare, print, monitor, and track ballot packets sent to and returned from voters. Using the official ballot PDF created by the certified election management system, this tool enables on-demand ballot printing and audit file creation to enable "one-to-one" validation and tracking of every ballot packet throughout the entire mail voting process from ballot preparation, printing, and assembly through delivery to the voters address and return back to the election office. This is the foundation that provides the data and mail packet accuracy and enhanced chain-of-custody/visibility demanded of election officials by voters.

Print mail-in ballots and other election information with high-quality inkjet.
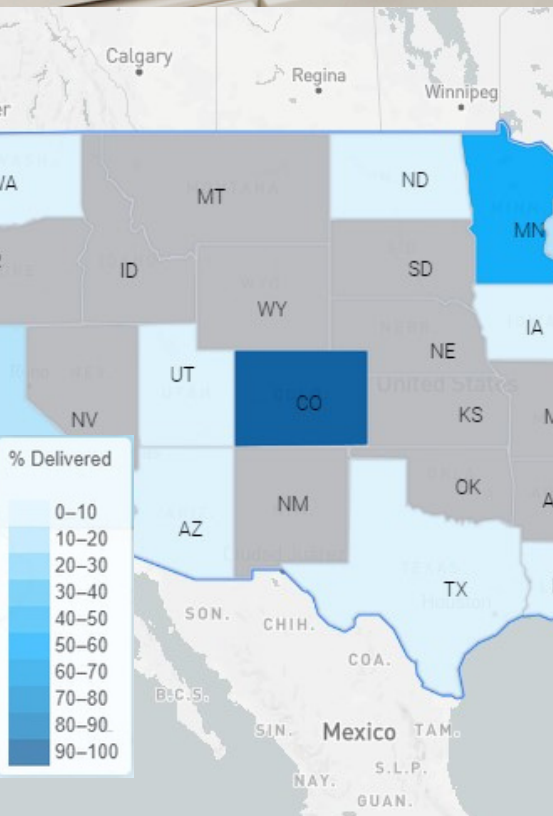

Print accurate ballots on demand

Our advanced inkjet technology makes it possible to cost-effectively produce ballots in-house on demand. Eliminate the cost and spoilage associated with pre-printed/outsourced ballots while gaining flexibility and confidence to meet growing paper ballot needs. Whether you need 50,000 or 500,000 ballots, BlueCrest has proven experience and solutions to help produce ballots that meet the exacting standards of the tabulation community. The BlueCrest printing systems provide high-quality print resolution to help ensure consistent ballot integrity and tracking as part of an end-to-end solution.

High integrity ballot packet assembly

The Relia-Vote solution leverages our industry-leading inserting platforms to accurately assemble, insert, and address all of the components of the ballot packet into an envelope for mailing. These solutions feature high-integrity capabilities including file-based processing, ballot type matching, and content verification with complete audit trails. In-line printing options help you take advantage of mailpiece tracking by adding the Intelligent Mail barcode. Known for their integrity and performance, BlueCrest inserters have been used for over 20 years to accurately assemble and mail ballot packets to voters.

Assemble mail ballot packets with speed and integrity with BlueCrest inserters.

Mail ballot tracking

The rise in mail balloting has also increased the demand for transparency and monitoring of the process. Election officials now need to manage, account for, track, and audit every mailed ballot traveling to and from each voter. By using the Intelligent Mail® (IMb) barcode, Relia-Vote solutions can help secure the highest USPS® discounts and enable tracking of the delivery of every outbound and inbound mail packet with easily accessible records. Relia-Vote Ballot Manager Software makes it easy to implement mail ballot tracking as well as enabling one-to-one ballot processing.

Outbound ballot processing

Our industry-leading sorting platforms automate and optimize outbound ballot processing. Election officials can realize the highest integrity, accuracy, and accountability while reducing postage and labor costs. Relia-Vote sorting solutions verify each outbound packet and archive images of every piece mailed, all while achieving optimal postal rates and postal service tracking. Help reduce risk by gaining transparency, accuracy, and detailed forensics across the entire election process with secure outbound ballot processing.

BlueCrest sorters process return ballots with speed and accuracy.

Process return ballots quickly

Relia-Vote sorting solutions can also be used to automate the return ballot process with speed and accuracy. Proven sorter technology inspects and validates each returned ballot packet envelope while also automating many required processing functions such as endorsing, verifying, sorting, and opening.

Relia-Vote solutions help ensure the timely and accurate completion of these critical steps while reducing labor and supporting a secure and fully auditable mail ballot voting process.

Signature Verification Options

Inline Auto Signature Verification (ASV) software compares signatures from the scanned ballot envelopes to those on file in the voter registration system. Featuring industry-leading verification software that protects against fraud, the Inline ASV software will reduce the amount of time it takes to manually verify each voter's signature. Alternatively, our Manual Signature Verification (MSV) feature, allows an election staff to manually compare the scanned signature image on the return envelope against the signature on file presented side-by-side on a computer screen for visual comparison and verification.
